

What advice would you give your great grandchildren?

I would advise them to study hard so they can earn a good living in the future. Find a career or job that you can enjoy doing.

Absolutely stay away from any types of drugs. They ruin lives and happiness of not only you but other family members.

Listen to your parents and show them you love them by sharing things with them.

Join in things in school and have fun.

Do your best to get along with others.

ALWAYS show your great grandparents that you love them. Hugs are nice! (I'm sure you know Great Grandma added this.)
